## TESTIMONIAL

NUGENT Carpentry are currently delivering the product we designed and specified with great speed and efficiency. The project co-ordinators were a little apprehensive with the 6 storey design but the experience and practical knowledge exuded by NUGENT Carpentry has ensured the swift and safe building of the Project. Their attention to Health and Safety is exemplary and very important for the more complicated type of project such as this.

MICHAEL DUFFY  
Project Manager

## TESTIMONIAL

We believe that we have built a flagship development in the heart of Peckham, greatly assisted by the competence of the good subcontractors we are using for this project. NUGENT Carpentry is one of those subcontractors. Their well organised erection of the timber frame followed by the good quality of their internal carpentry has greatly helped this project to be a success for all parties concerned.

## TESTIMONIAL

I have been involved with NUGENT Carpentry for many years, we needed a big player to complete the Carpentry works on this project and I had no hesitation in letting this contract to them. With the site costs being controlled by the Joint Venture Funding I needed a good subcontractor to complete an All Risk contract.

MARK HEIGHO  
Managing Surveyor
